CREOLEAP

LEAP INTO THE AI FUTURE

AI/Robotics Training Report

28 Oct – 31 Oct 2025

From: CREOLEAP TECHNOLOGIES PVT LTD

Week Duration: 28th Oct to 31th Oct 2025

Submitted by: Mr. Ruthrakumar. M & Mr. Chris Jaron. B

Session Information

Subject/Program: AI & Robotics Training

No. of Sessions/Periods Planned: 10

No. of Sessions/Periods Completed: 10

Date	Trainer Name	School Name	Class	Section	Period	Chapter Name	Planned (Yes/No)	Completed (Yes/No)	Detailed Work Done / Session Summary
28 October 2025	Ruthra kumar. M	Corporation Higher Secondary School, Ratinapuri, Coimbatore.	VIII	A1,A2, A3,B	3,4, 6 and 7	Chapter 7 - 10	Yes	Yes	The session began with Ultrasonic Sensor by distance measure on serial monitor and also using a Servo Motor, followed by changing the RGB LED based on distance, and finally the Car Parking System activity. Students actively participated and learned through hands-on practice
28 October 2025	Chris Jaron B	Corporation Girls Higher Secondary School, Ranganathapuram, Coimbatore	VIII	A	2,3, 4,5	Chapter 1-8	Yes	Yes	The session began with a quick recap of the previous class topics, followed by practical activities on the ultrasonic sensor. Students learned how to use the ultrasonic sensor to change RGB colors and create a car parking system using distance measurement. The session also covered the ultrasonic sensor integrated with a servo motor, allowing students to understand its application in automated movement.

29 October 2025	Ruthra kumar. M	Corporation Girls Higher Secondary School, Oppanakara street, Coimbatore	VIII & IX	(A,B,E) &(B,E, C) (C and D)&(A, D,F)	2,3, 4,5 6	Chapter 7-10 Chapter 1-4	Yes	Yes	Session began with Introduction to AI and Robotics followed by learned LED blinking on AIC, IR Sensor using a push button with LED and buzzer and Traffic light and RGB led by theoretical explanation about ultrasonic sensor and the Ultrasonic Sensor using a Servo Motor, followed by changing the RGB LED based on distance, and finally the Car Parking System activity. Students also learned with hands on learning by understanding the concepts
29 October 2025	Chris Jaron B	Corporation Higher Secondary School, North Coimbatore, Coimbatore.	VIII	A, B	3,6	Chapters 4-10	Yes	Yes	The session began with an IR Sensor using a push button with LED and buzzer and Traffic light and RGB led and Ultrasonic Sensor and its working by servo motors, RGB and Car parking system were explained, and students engaged in a practical session to understand its application. Overall, students gained a clear understanding of the electronic components through interactive and experiential learning.

30 October 2025	Ruthra kumar. M	Corporation Middle School, Krishnapuram Coimbatore	VIII	A, B	3,4, 5	Chapters 5-10	Yes	Yes	Session began with Traffic light and RGB led then Ultrasonic sensor followed by students learned Distance Measurement on serial monitor and using Servo motor and change RGB color using ULT and Car Parking System. Students understood the electronic components of the STEM City Kit and their working.
30 October 2025	Ruthra kumar. M	Corporation High School, Varadharajapuram, Coimbatore.	VIII	A	7,8	Chapters 7-10	Yes	Yes	Session began with an Ultrasonic Sensor and its working by servo motors, RGB and Car parking system were explained, and students engaged in a practical session to understand its application. Overall, students gained a clear understanding of the electronic components through interactive and experiential learning.

30 October 2025	Chris Jaron B	Corporation Boys Higher Secondary School, Sidhapudhur, Coimbatore	VIII	A	3,4, 6,7	Chapter 1-10	Yes	Yes	The session began with practical activities on IR Sensor using a push button with LED and buzzer and Traffic light and RGB led the ultrasonic sensor. Students learned how to use the ultrasonic sensor to change RGB colors and create a car parking system using distance measurement. The session also covered the ultrasonic sensor integrated with a servo motor and car parking system.
31 October 2025	Ruthra kumar. M	Corporation Middle School, Kottai, Coimbatore	VIII	A	3,4, 5	Chapters 5-10	Yes	Yes	The session began with Traffic light and RGB led then Ultrasonic sensor followed by students learned Distance Measurement on serial monitor and using Servo motor and change RGB color using ULT and Car Parking System. Students understood the electronic components of the STEM City Kit and their working.

31 October 2025	Ruthra kumar. M	Corporation Middle School, Masakalipalayam, Coimbatore.	VIII	A	7,8	Chapters 7-10	Yes	Yes	The session began with an Ultrasonic Sensor by Distance Measure on serial monitor and its working by changing angle of servo motors, change color of RGB LED and Car parking system using Ultrasonic sensor were explained, and students engaged in a practical session to understand its application.
31 October 2025	Chris Jaron B	Corporation Girls Higher Secondary School, Sidhapudhur, Coimbatore	VIII	A,B	2,3, 4,5, 6	Chapters 1-10	Yes	Yes	The session began with Introduction to AI and Robotics and practical activities on IR Sensor using a push button with LED and buzzer and Traffic light and RGB led the ultrasonic sensor. Students learned how to use the ultrasonic sensor to change RGB colors and create a car parking system using distance measurement. The session also covered the ultrasonic sensor integrated with a servo motor and car parking system.

Progress Overview

Overall Progress

Over the span of Four days, Students actively participated in this week's sessions on Complete the Chapters 1-10 across some schools. They showed attentiveness and interest in learning while exploring the AIC board, its electronic components, and their functions.

Key concepts covered included:

1. Introduction to AI & Robotics
2. LED Blinking on AIC
3. IR Sensor with Buzzer
4. Push Button with LED and Buzzer
5. RGB
6. Traffic Light
7. Distance Measure with serial monitor
8. Ultrasonic sensor using Servo Motor
9. Changing RGB using ULT Sensor
10. Car parking using ULT Sensor

Student Engagement

Student engagement during this week's AI and Robotics sessions was active and consistent. Learners showed interest in exploring the AIC board and STEM City Kit components like sensors, servo motor, ultrasonic sensor, LED, IR sensor, PUSH Button and Servo motor. They took part in both theory and practical activities such as LED blinking, IR with buzzer and LED, and push button with buzzer and LED, RGB, Traffic light and Ultrasonic Sensor with Servo and with Car parking system. Students worked together during practical tasks, asked questions, and helped each other understand the components. Their attentiveness showed strong interest, and they gained confidence in applying the concepts through practice.

Students Covered

Total number of students covered across the week : 773 Students.

- Corporation Higher Secondary School, Ratinapuri : 138 Students 8 only engaged.
- Corporation Girls Higher Secondary School, Ranganathapuram : 32 Students 8 only engaged.
- Corporation Girls Higher Secondary School, Oppanakara street : 351 Students 8 and 9 only engaged.
- Corporation Higher Secondary School, North Coimbatore : 64 Students 8 only 9 engaged.
- Corporation Middle School, Krishnapuram : 42 Students across Class 8 only engaged.
- Corporation High School, Varadharajapuram : 15 Students across Class 8 only engaged.
- Corporation Boys Higher Secondary School, Sidhapudhur : 23 Students 8 only engaged.
- Corporation Middle School, Kottai : 45 Students across Class 8 only engaged.
- Corporation Middle School, Masakalipalayam : 35 Students across Class 8 only engaged.
- Corporation Girls Higher Secondary School, Sidhapudhur : 28 Students 8 only engaged.

Trainer Feedback

Observation

- Students were attentive and showed a clear understanding of the working concepts.
- They listened carefully during explanations and were able to follow technical ideas.

- Overall, students actively participated and displayed enthusiasm in both learning and project demonstrations.

- Students showed improvement in logical thinking and troubleshooting.

Suggestion

- More sessions are needed to train students and reinforce the concepts in detail.
- Concepts should be explained more briefly and interactively for better understanding.
- Improvement is required in session delivery at some schools to ensure consistent learning outcomes.

- Encourage teamwork by assigning small group tasks to improve collaboration and problem-solving.

- Add short Q&A or recap at the end of sessions to check understanding and reinforce key points.

- Motivate students to explain components in their own words to build confidence in communication.
